

NITROGENPROTECT

**Increases root,
leaf and fruit size.**

DATA SHEET

NITROGENPROTECT®

SHAKE WELL BEFORE USE! **NitrogenProtect** is a biofertilizer whose action is based on the activity of the bacteria *Azospirillum brasilense*. These types of bacteria live naturally in the soil near the roots of the plants, from where they establish a mutually beneficial relationship with the roots.

NitrogenProtect is a product that is of high quality, harmless to humans and beneficial to the environment. Increasing the size of root, leaf and fruit, giving you a 100% organic solution in a more logical and natural way with the environment.

BIOLOGICAL COMPOSITION

- *Azospirillum brasilense* 1x10⁹ UFC/ml

APPLICATION FREQUENCY

It is recommended to make 3-5 applications for optimal colonization of the plant, with a frequency of 5 days each.

COMPATIBILITY WITH OTHER PRODUCTS

NitrogenProtect is compatible with some types of fertilizers. In case of applying a bactericide, fungicide, pesticide or insecticide, it is necessary to check the residence time of the product and make sure that the application of NitrogenProtect is outside that period.

STORAGE AND TRANSPORT CONDITIONS

- Store the product in cool, covered places at room temperature.
- Do not expose the product to the sun rays

TOXICITY

100% Organic product.

It is not phytotoxic at the recommended concentrations, stages and forms of application. In case of ingestion or discomfort at the time of use, cause vomiting and consult your doctor.

APPLICATION METHOD

- NitrogenProtect comes from a fresh and metabolically active crop, which is why it is recommended for use at the time of reception.
- Very early or during the afternoon, avoiding long hours of sun and solar radiation
- The product is applied directly to the base of the plant putting the sprinkler in STREAM mode, before watering the plants
- Do not eat, drink or smoke during applications, wash your hands before and after using the product
