

TRICOPROTECT

Protection against root fungus.

DATA SHEET

TRICOPROTECT®

SHAKE WELL BEFORE USE! TricoProtect is a biofertilizer/biofungicide whose action is based on the activity of the fungus *Trichoderma harzianum*.

TricoProtect guarantees a high-quality product, harmless to humans and beneficial to the environment, ideal for all types of agricultural, fruit and ornamental crops. Providing you with a 100% organic solution in a more logical and natural way with the environment.

BIOLOGICAL COMPOSITION

- *Trichoderma harzianum* 1x10⁹ UFC/ml

APPLICATION FREQUENCY

It is recommended to make 3-5 applications for optimal colonization of the plant, with a frequency of 5 days each.

COMPATIBILITY WITH OTHER PRODUCTS

TricoProtect is compatible with all types of fertilizers. In case of applying a bactericide, fungicide, pesticide or insecticide, it is necessary to check the residence time of the product and make sure that the application of TricoProtect is outside that period.

STORAGE AND TRANSPORT CONDITIONS

- Store the product in cool, covered places at room temperature.
- Do not expose the product to the sun rays

TOXICITY

100% Organic product.

It is not phytotoxic at the recommended concentrations, stages and forms of application. In case of ingestion or discomfort at the time of use, cause vomiting and consult your doctor.

APPLICATION METHOD

- TricoProtect comes from a fresh and metabolically active crop, which is why it is recommended for use at the time of reception.
- Very early or during the afternoon, avoiding long hours of sun and solar radiation
- The product is applied directly to the base of the plant putting the sprinkler in STREAM mode, before watering the plants
- Do not eat, drink or smoke during applications, wash your hands before and after using the product
