

BERRIESMICROBIOTA

BERRIES MICROBIOTA

PLANT MICROBIOTA

SPECIFIC MICROORGANISMS FOR BERRIES FILLING

BerriesMicrobiota Filling owned by Microendo Inc, is the first product made from the selection of the best microorganisms obtained from Berries plants, being a unique product in the market. **BerriesMicrobiota Filling** is a bio-inoculant made from a probiotic mixture that stimulates the filling of the fruit of Berries. Increasing the diameter and thickness of the fruit up to 18% more. In addition to strengthening the immune system of the plant and decreasing stress in it; recovering the Microbiota. With the use of **BerriesMicrobiota Filling** you can reduce up to 50% the use of your chemical fertilizers. Providing you with a 100% organic solution in a more logical and natural way with the environment.

BENEFITS

- Bio-inoculant specially designed for berries filling
- Increases fruit size.
- Balances the plant's Microbiota
- Protection against pathogenic fungi.
- Reduces plant stress.

BIOLOGICAL COMPOSITION

Providencia spp. 1x10¹⁴ UFC/ml

Bacillus spp. 1x10¹⁴ UFC/ml

Kocuria spp. 1x10¹⁴ UFC/ml

APPLICATION METHOD

BerriesMicrobiota Filling comes from a fresh and metabolically active crop, so its use is recommended at the time of receipt. The product is applied injected to the root or with pump or directly in the irrigation system. Always make sure that the implement to be used has not had a previous bactericide or fungicide. Wash the fertigation pump or water tank very well before using them. Preferably use neutral soap powder. Do not eat, drink or smoke during applications, wash your hands before and after using this product. It is recommended to dilute for every 1 hectare, 1 Liter of **BerriesMicrobiota Filling**, composed of Stimulant, Antistress and Protector, 333 ml of each product in natural water as clean as possible. Never put only one of the three components, as the three products of **BerriesMicrobiota Filling** act together. Do not dilute in more than the indicated amount of **BerriesMicrobiota Filling** because microbial crops require a minimum concentration to act.

APPLICATION FREQUENCY

It is recommended to make 3 applications per hectare for an optimal colonization of the plant with a frequency of 7-10 days each, which will achieve in the plant a healthy nutrition and defense of the crop.

DOSE

Crop	<i>Berries</i>
Dose	1 L/1 ha
Frequency	7-10 days
Application	3 applications

COMPATIBILITY WITH OTHER PRODUCTS

BerriesMicrobiota Filling is compatible with some fertilizers. In case of applying a bactericide, fungicide, pesticide or insecticide, it is necessary to check the residence time of said product and make sure that the application of **BerriesMicrobiota Filling** is outside this period, as well as wash the material with which the application is going to be made well with neutral soap to ensure that traces of the product are avoided. Consult your technical advisor for compatibility with other products. It is not recommended to apply **BerriesMicrobiota Filling** if a subsequent application of bactericides, fungicides or any similar product is planned as this would kill the population of microorganisms applied with **BerriesMicrobiota Filling**.

STORAGE AND TRANSPORT

Store the product in cool, covered places at room temperature. Do not expose it to the sun's rays.

TOXICITY

100% organic product. It is not phytotoxic at the recommended concentrations, stages and forms of application. In case of ingestion or discomfort at the time of use, induce vomiting and consult your doctor.
