

COLDPROTECT

COLD STRESS PROTECTOR

ORGANIC PROTECTOR FOR PLANTS

HOME LINE

SHAKE WELL BEFORE USE!

ColdProtect owned by Microendo Inc., is the first product developed from the selection of the best microorganisms for plant cold protection, being a patented and unique product in the market

ColdProtect is a bio-inoculant made from a probiotic mixture of different microorganisms that reduces cold stress in plants by inhibiting oxidative stress caused by cold. In addition to strengthening the plant's immune system and enhancing its nutrition, it becomes a perfect cryoprotectant for the plant cells, providing you with a 100% organic solution in a more logical and natural way for the environment.

BENEFITS

- More frost-resistant plants against diseases.
- Reduces cold stress in the plant
- Strengthens the immune system.

BIOLOGICAL COMPOSITION

Enterobacter spp. 1×10^9 UFC/ml

APPLICATION METHOD

ColdProtect comes from a fresh and metabolically active crop, so its use is recommended upon receipt. Apply either very early or in the afternoon, avoiding long hours of sunlight and solar radiation. The product is applied directly to the base of the plant by setting the nozzle to STREAM mode, before watering the plants. Do not eat, drink, or smoke during the application, and wash your hands before and after using the product.

APPLICATION FREQUENCY

It is recommended to make 3-5 applications for optimal colonization of the plant, with a frequency of 5 days each.
