MÉTODO DE APLICACIÓN

DarkMicrobiota comes from a fresh and sterile crop, so its use is recommended at the time of receipt. Very early or during the afternoon, avoiding long hours of sun and solar radiation. The product is injected into the root or in drench directly to the base of the plant. Always make sure that the implement to be used has not had a previous bactericide or fungicide. Wash the pump thoroughly before use. Preferably use neutral powdered soap. Do not eat, drink or smoke during applications, wash your hands before and after using this product. Is recommended to dilute 1 liter of **DarkMicrobiota** per hectare in natural water as clean as possible for crops of 1-9 kg and for crops of 10-50 kg use 2 liters per hectare and 60-100 kg use 3 liters per hectare. Do not dilute in more than 200 L per liter of **DarkMicrobiota** because the solution requires a minimum concentration for the soil Microbiota.

COMPATIBILITY WITH OTHER PRODUCTS

DarkMicrobiota is compatible with some fertilizers. In case of applying a bactericide, fungicide, pesticide or insecticide, it is necessary to check the residence time of said product and make sure that the application of **DarkMicrobiota** is outside this period, as well as wash the material with which the application is going to be made well with neutral soap to ensure that traces of the product are avoided. Consult your technical advisor for compatibility with other products. It is not recommended to apply **DarkMicrobiota** if a subsequent application of bactericides, fungicides or any similar product is planned as this would kill the population of microorganisms applied with **DarkMicrobiota**.

STORAGE AND TRANSPORT

Store the product in cool, covered places at room temperature. Do not expose it to the sun's rays.
