## HUMIC ACIDS AT 66%

### SOIL IMPROVER

SOIL IMPROVERS

**HumicProtect** is obtained through the extraction of Leonhardite being a 100% organic product, directly influences the fertility of the soil and in turn contributes significantly to its stability, affecting the absorption of nutrients and consequently the growth of the plant.

## BENEFITS

- Stimulates the development of Microbiota in the soil.
- Improves soil structure and moisture retention.
- Increases nutrient absorption capacity
- Strengthens roots and improves the vigor of the plant.

## BIOLOGICAL COMPOSITION

<i>Humic Acids</i>	66.5%
<i>Fulvic Acids and other org mat.</i>	10.10%
<i>Potassium</i>	10.20%
<i>Inert Materials</i>	13.20%

## AGRONOMIC USE

**HumicProtect** guarantees a 100% organic and high quality product that can be used for the following crops, although this recommendation is not limited to other agricultural crops:

**Vegetables in general:** Cabbage, cauliflower, broccoli, compass cabbage, radish. **Fruit trees**

**in general:** Avocado, citrus, peach, guava, mango, coconut, banana, papaya. **Solanaceae:**

Tomato, chili, potato, eggplant, pepper. **Cucurbits:** Cucumber, melon, watermelon, pumpkins.

**Seeds:** corn and sorghum, wheat, barley, and oats. **Berries:** blueberry, raspberry, blackberry,

blackberry. **Other crops:** Celery, asparagus, lettuce, onion, chives, carrot, walnut, pineapple,

vine, sugar cane, cotton, agaves, oil palm.

## APPLICATION METHOD

**HumicProtect** is applied by injecting it into the root with a pump or directly into the irrigation system, as well as via foliar application. Always ensure that the equipment to be used has not previously been in contact with pesticides or insecticides. Clean the pump thoroughly before use, preferably with neutral powdered soap. It is recommended to dilute 250 g of HumicProtect per hectare in the cleanest natural water possible for crops weighing 1-9 kg; for crops weighing 10-50 kg, use 1 kg per hectare, and for crops weighing 60-100 kg, use 1.5 kg per hectare of **HumicProtect**. Do not dilute more than 200 L of water for every 250 g of **HumicProtect**, as minimum doses are required to create a favorable effect on the plant. Do not eat, drink, or smoke during applications, and wash your hands before and after using the product.

### SOIL IMPROVER

SOIL IMPROVERS

## APPLICATION FREQUENCY

It is recommended to make 2-3 applications per hectare for an optimal colonization of the plant with a frequency of 7-10 days each, which will achieve in the plant a healthy nutrition and defense of the crop.

## DOSE

Crop	General
Dose	250g/ha
Frequency	Monthly
Application	2-3 applications

## COMPATIBILITY WITH OTHER PRODUCTS

**HumicProtect** is compatible with some fertilizers. In case of applying a bactericide, fungicide, pesticide or insecticide, it is necessary to check the residence time of said product and make sure that the application of **HumicProtect** is outside this period, as well as wash the material with which the application is going to be made well with neutral soap to ensure that traces of the product are avoided. Consult your technical advisor for compatibility with other products. It is not recommended to apply **HumicProtect** if a subsequent application of bactericides, fungicides or any similar product is planned as this would kill the population of microorganisms applied with **HumicProtect**.

## STORAGE AND TRANSPORT

Store the product in cool, covered places at room temperature. Do not expose it to the sun's rays.

## TOXICITY

**100% organic product.** It is not phytotoxic at the recommended concentrations, stages and forms of application. In case of ingestion or discomfort at the time of use, induce vomiting and consult your doctor.
