INSECT PROTECTOR FOR PLANTS

ORGANIC PROTECTOR FOR HOME

HOME LINE

SHAKE WELL BEFORE USE!

InsectProtect B. *bassiana* is a bioinsecticide whose action is based on the entomopathogenic activity of the fungus *Beauveria bassiana* against insect pests that affect crops and plants in general. InsectProtect B. *bassiana* ensures a high-quality product, harmless to humans and beneficial for the environment, ideal for all types of agricultural, fruit, and ornamental crops, providing you with a 100% organic solution in a more logical and natural way for the environment.

BENEFITS

- Controls whiteflies, moths, and mealybugs.
- It can spread from one insect to another through spores.

BIOLOGICAL COMPOSITION

Beauveria bassiana spp 1×10^9 UFC/ml

APPLICATION METHOD

InsectProtect B. *bassiana* comes from a fresh and metabolically active crop, so its use is recommended upon receipt. Apply early in the morning or during the afternoon, avoiding long hours of sunlight and solar radiation. The product is applied foliar or directly to the plant's leaves by setting the sprayer nozzle to SPRAY mode before watering the plants. Do not eat, drink, or smoke during application; wash your hands before and after using the product.

APPLICATION FREQUENCY

It is recommended to make 3-5 applications for optimal colonization of the plant, with a frequency of 5 days each.
